

ACES is an international student service program, who partners with independent (private) schools in the US to manage their students of foreign countries. ACES' partner in Spain, Company of Linguistic Service has been promoting educational and cultural immersion programs worldwide for over 30 years. They have arranged academic students and summer camp students in the USA since the 1980s. In summer 2017, there will be a group of 15-20 students coming to live in American host families for four weeks.

Students are 13-18 years old who have a desire to learn and experience more about American culture and life style. The students are outgoing and very personable. They can communicate in English, some fluently. In return, American host families can bring in and enjoy some Spanish culture and language into their homes. Host family children can enjoy their company for a few weeks. This is an American immersion program. Students are excited about the chance to learn about American families activities.

June 30 – July 27	\$1,000	<u>Application</u>
Duration	Hosting Stipend	www.acesus.org – host families

Host families are expected to provide room and board, as well as meals. Families will learn and experience your host daughter/son's culture, food and language while you are sharing ours to them. Host parents should exercise general parental supervision over your student. Please involve them in daily activities and house chores. Family members should speak English when student is present. Students should visit and tour Washington DC, your local cities and attractions at least once during their stay. More is always welcome.

Host family members should speak English while students are present. Host families are required to pick up your students at Dulles Airport on June 30th, and bring them back on July 27th.

A Chaperon from Spain will stay with a host family in this area for the entire program. She/he will assist host families and ACES to resolve any issues that may occur. Students have their spending money and medical insurance.
